### **DETAILED ACTION**

Claims 15-28 are currently presented and have been examined.

#### ***Election/Restrictions***

Newly submitted claim 28 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claim 28 recites a transmission method of transmitting audio and video data which at least includes separate utilities such as establishing an RTP header for each audio data packet and establishing redundant packets based on a predetermined number of audio packets which is distinct from claims 15-27. Therefore, Claims 15-27 and 28 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable are related as subcombinations disclosed as usable together in a single combination. See MPEP § 806.05(d).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 28 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

This application is in condition for allowance except for the presence of claim 28 which is directed to an invention constructively non-elected by original presentation. Accordingly, claim 28 has been cancelled.

#### ***Drawings***

The drawings are objected to because Figures 14A and 14B appear to be a single figure on a single page and it is not clear what parts of the single constitutes Figure 14A and 14B.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because of the above reasons. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are

Art Unit: 2443

required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

***Allowable Subject Matter***

Claims 15-27 are allowed in view of the Applicant's arguments, the cited prior art of record, and the prosecution history of the instant application, from which the reasons for allowance are clear.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
